System 9 power tools

Built on trust. Empowering you.

Powered by the latest battery technology, our first-ever wireless charger and a handpiece designed to fully grasp your needs, System 9 is our most advanced power tool ever—for unmatched performance, whenever you're ready.

Just like its powerful legacy, System 9 power tools didn't start with us.

It started with you.

At Stryker, we've watched the mastery of a physician at work. We've stood inches away from millimeter precision. We've witnessed what the right tools make possible in the right hands—building trust time and time again. And yet a trust this deep can always be deeper, which is why we created System 9 power tools.

Every point of contact with System 9 power tools is intended to optimize ease of use and peace of mind. It includes our **first-ever wireless charger, advanced battery technology and an informed handpiece design that's been rethought top to bottom.**

Excellence isn't just about what happens when you pull the trigger. It's also about what happens before and beyond the procedure. From the **holistic ergonomic handpiece design powered through the innovative twist-lock connection to maintaining sterility and charge of batteries post-sterilization,** System 9 power tools enhance the entire experience—for the whole hospital.

Customer feedback is at the forefront of everything we do, while the voice of Dr. Homer Stryker is also in the back of our minds. That's how we unite the proven legacy of the past with the possibilities of the future—to build trust that empowers you.

System 9 power tools prove that we can enhance the most important power of all—the bond between a surgeon and the tool in their hand.

Cordless driver

Single trigger rotary drill

Dual trigger rotary drill

EZout powered acetabular revision system

Building trust that **empowers for 40 years**

Sometimes by tweaking, other times through total transformation, we've made our power tools better without changing the core of what made them the most dependable in the first place.

From the early days of Dr. Homer Stryker to the introduction of System 9, the same commitment has been clear. Together with our customers, we create products that address the current and future surgical landscape.

Multiple handpieces, **all kinds of confidence**

A versatile selection to meet your procedural needs

Innovative technology **in your hands today**

Controlled, consistent and accurate

**EZout powered
acetabular revision
system**

**Precision oscillating
tip saw**

**Cordless driver with
POWEReam technology**

Cut with controlled power with the System 9 EZout system. The system powers the cutting, providing you with predictable, consistent results.

Enhanced design and expanded line of precision cartridges for ankle, shoulder, hip and knee arthroplasty, evolving the way you cut.

Drill, cut and ream with Stryker's exclusive technology, designed to provide a significant increase in torque for challenging procedures.

Now you have an **eye for power**

Efficiency through tactile and visual feedback

System 9's battery indicators are designed to be brighter and repositioned, creating greater visibility for surgeons and the surgical team. The battery housing features new contacts so that your battery is more dependable and durable.

Battery visibility, amplified

Fully depleted or error detected

The charger that **changes everything**

Convenience meets competence

Our new wireless charger is the first of its kind—an advanced piece of technology for a smarter, more streamlined OR experience.

- ✔ Most versatile battery charging capabilities to date, allowing you to charge your batteries in any environment that accommodates your workflow
- ✔ Ability to confirm battery status pre-procedure
- ✔ Simplified user interface
- ✔ Ability to charge battery post sterilization while maintaining sterility, including ability to charge through blue wrap
- ✔ Custom top housing designed to accommodate various charging methods
- ✔ Foreign object detection application

A handle on design **and comfort**

**Built for confidence,
innovated for toughness**

Thoughtful contours

Well-balanced and designed to fit in your palm while reducing the number of pressure points while cutting.

.....

Built to outlast

Over time, exposure to pressurized water and harsh chemicals can wear down the toughest power tools—until now. Introducing our most robust anodized coating paired with IPX 9 rating for lasting performance.

.....

Improved safety pockets

Avoid accidental activation and perform with greater confidence and peace of mind.

.....

Twist-lock

Our new handpiece-to-battery interface provides tactile and visual feedback, enabling efficient assembly and confident connection.
